1	Well structured class and the professor provides additional insight on the material during lectures. His lectures occasionally feel long winded, but I understand some material deserves additional explanation. The slides he provides have plenty of additional information and context which help to further explain material and are a great reference. There are relevant assignments throughout the class which are graded in a timely manner. He provides solutions which are a great way to review before exams and correct your procedure. Overall, great class and great professor who is willing to help and provide additional help/resources if necessary.
2	Very good proffesor and very knowledgeable on the subject.
3	The professor is very approachable and I appreciate how applicable he makes this class.
4	Professor Shi was always there to answer any questions I had after class, even if the questions were for a different materials class. An incredibly nice man, who very much wants his students to learn, but does so by trying to engage them in the material, asking probing questions, and explaining assignments in detail with excellent visual aids. His grading is not overly strict, and his class structure is fairly relaxed, with some classes being held online and exams being take-home.
